<body>
<center><u>
<h2>The wings of fire</h2>
<font size="3">Author : Dr. A.P.J Abdul Kalam, Arun Tiwari</font></u>
</center>
```

<i>Vi>
Sob>Wings of Fire (1999), is the autobiography of the Missile Man of India and President of India, Dr. A. P. J. Abdul Kalam. It was written by him and Arun Tiwari. In the autobiography, Kalam examines his early life, effort, hardship, fortitude, luck and chance that eventually led him to lead Indian space research, nuclear and missile programs. Kalam started his career, after graduating from Aerospace engineering at Madras Institute of Technology, at Hindustan Aeronautics Limited and was assigned to build a hovercraft prototype. Later he moved to ISRO and helped establish the Vikram Sarabhai Space Centre and pioneered the first space launch-vehicle program. During the 1990s and early 2000, Kalam moved to the DRDO to lead the Indian nuclear weapons program, with particular successes in thermonuclear weapons development culminating in the operation Smiling Buddha and an ICBM Agni.

<h1>Tree Data Structure</h1>Root: The root node is the topmost node in the tree hierarchy. In other words, the root node is the one that doesn't have any parent. In the above structure, node numbered 1 is the root node of the tree. If a node is directly linked to some other node, it would be called a parent-child relationship.

Child node: If the node is a descendant of any node, then the node is known as a child node.

Parent: If the node contains any sub-node, then that node is said to be the parent of that sub-node.

Sibling: The nodes that have the same parent are known as siblings.

<h1>Taj Mahal</h1>
<center><img src="taj.jpeg" style="width:300px;"></center>
The Taj Mahal 'Crown of the Palace', is an ivory-white marble mausoleum on the southern
bank of the river Yamuna in the Indian city of Agra. It was commissioned in 1632 by the
Mughal emperor Shah Jahan (reigned from 1628 to 1658) to house the tomb of his favorite
wife, Mumtaz Mahal; it also houses the tomb of Shah Jahan himself. The tomb is the
centerpiece of a 17-hectare(42-acre) complex, which includes a mosque and a guest house, and
is set in formal gardens bounded on three sides by a crenelated wall.

<body>
<h1>The Colosseum,Rome</h1>
<center><img src="colossem.jpeg" style="width:350px;height: 200px"></center>
The Colosseum is an oval amphitheatre in the centre of the city of Rome, Italy, just east of
the Roman Forum. It is the largest ancient amphitheatre ever built, and is still the largest
standing amphitheatre in the world today, despite its age. Construction began under the
emperor Vespasian (r. 69-79 AD) in 72 and was completed in 80 AD under his successor and
```

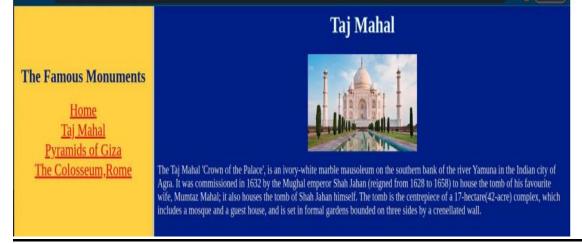

heir, Titus (r. 79–81). Further modifications were made during the reign of Domitian (r. 81–96). The three emperors that were patrons of the work are known as the Flavian dynasty, and the amphitheatre was named the Flavian Amphitheatre (Latin: Amphitheatrum Flavium; Italian: Anfiteatro Flavio by later classicists and archaeologists for its association with their family name (Flavius). The Colosseum is built of travertine limestone, tuff (volcanic rock), and brick-faced concrete.

AIM

Build a PHP code to store name of students in an array and display it using print_r function. Sort and Display the same using asort & print_r functions.

SOURCE CODE

```
<?php
$a = array("Anjala", "Christeena", "Blessey","Angela");
print_r($a);
echo("<br>Ascending order : ");
asort($a);
print_r($a);
echo("<br>Descending order : ");
arsort($a);
print_r($a);
?>
```

OUTPUT

```
Array ([0] => Anjala [1] => Christeena [2] => Blessey [3] => Angela )
Ascending order : Array ([3] => Angela [0] => Anjala [2] => Blessey [1] => Christeena )
Descending order : Array ([1] => Christeena [2] => Blessey [0] => Anjala [3] => Angela )
```
